

Shade Sail Blinds

Measuring-Up Form

Lean-To Conservatory

Before measuring these dimensions, we recommend that you read the Measuring-Up Guide on our website which will explain how, and where, to take these measurements. The Measuring-Up Guide can be found here <https://shadesailblinds.com/measuring-up-guide/>

If you are unsure of how measure-up your conservatory correctly, or would like a little extra guidance, please do not hesitate to contact us and a member of our team will be happy to help you. If you do not feel comfortable measuring-up yourself, we now offer a measuring-up service, please contact us for availability and pricing.

Telephone: +44 1249 848649

Measurement Units

Please select which units you are using to take the measurements, inches, centimetres, or millimetres.

Inches []

Centimetres []

Millimetres []

Measurements

Measurements need to be accurate to within half an inch, or 1.0cm, or 10mm.

Apex – measure A to B:

Height – measure B to C:

Length 1 – measure E to F:

Length 2 – measure C to D:

Width – measure D to E:

Check Measurements

Length 1 & 2, and Apex & Width, should be identical pairs of measurements, or at least within 10mm of each other for most conservatories. Lean-To style conservatories, by their nature, can be slightly off square which can have a knock-on effect when designing and sizing bespoke Shade Sails. We ask our customers to measure and confirm both dimensions, we call these 'check measurements', so that any inconsistency's will become apparent.

Obstructions

Please indicate whether any of the following are present in the roof space and remember to submit large, clear photos of any obstructions along with this form. We may request further measurements associated with these obstructions and will use your submitted images to mark which measurements we need.

Tie-Bars: []

Window Winders/Electric Openers: []

Light Fittings:

Wall []

Apex []

Pendant []

Ceiling Fans: []

Drop Dimension:

Diameter Dimension:

Please see the Measuring-Up guide on our website for guidance on how to measure the Ceiling Fan 'drop' & 'diameter' dimensions.

Any other decorative pendant items (please specify):

.....

.....

In addition to these measurements and photos of possible obstructions, please provide good size, internal photos of all 4 sides of your conservatory roof space.
